DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - A. Claims 1-24, 26-32, drawn to a process and apparatus to produce an liquid concentrate, classified in class 366, subclass 152.1.
 - B. Claims 25, 33-36, drawn to a process of preparing liquid colorant, classified in class 366, subclass 189.

2. Inventions Group A and Group B are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as a manner to make differing cleaning/solvent concentrates, or medical/chemical formulations, and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1723

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Applicant is required to elect a species of the following additive as disclosed and claimed:

- A. a colorant *electrochromic*
- B. an optical brightener
- C. laser marking additive,
- D. an anti-settling agent
- E. a blowing agent
- F. a release agent
- G. light stabilizer.
- H. mixtures thereof.

If applicant desires an examination upon group H (mixtures thereof) applicant is required to choose a particular mixture from the groups, or to state clearly upon the record that each of the groups A through G are obvious variants over one another either alone or in combination.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic to the additive species.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
